

PlusTrac[®] for Mobilize[™]

A ZOLL Rescue Ready Service

Let PlusTrac help ensure your Mobilize trauma kit is always Rescue Ready[®]

You've taken the initiative to bring trauma kits into your workplace. Now you need to make sure these lifesaving tools are ready when you need them.

PlusTrac program management software and services ensure your trauma kit components are within their expiry dates, responder training is up to date, and staff and bystanders can locate the equipment when it really matters.

Complex Organization? No Problem.

Managing your Mobilize kits with PlusTrac is scalable and simple — no matter your organization's size or the number of kits in your program.

PlusTrac makes sense for large and small organizations. Whether your challenge is managing multiple locations or limited staff to oversee your safety program, PlusTrac can help manage the vital components.

Easily track:

- Kit readiness
- Kit locations
- Dates of responder trainings
- Inspection dates
- Consumable replacement dates

Design and Schedule your Program

PlusTrac standard reporting is customizable to meet your organizational needs. Collect current program data the way you need it and present it the way you prefer. Schedule daily, weekly, or monthly email reports, eliminating the need to log into PlusTrac to stay informed.

Multiple layers of management can view their individual areas of responsibility on a single screen that shows the current state of the program. With just a few keystrokes, get the exact details you need.

See something in a report that you want to explore further? Easily log in to investigate specific details.

Managing a Fleet of AEDs?

PlusTrac can manage both your AEDs and Mobilize kits for a holistic view of your entire safety program. Ensure your organization is Rescue Ready with PlusTrac program management from ZOLL[®].
